

Appendix 2.2

Report of International Conference Presentation

Name: (Presenter)	Norrathep Rattanavipanon
Affiliation:	Prince of Songkla University
Project Title:	ASEAN-Wide Cyber-Security Research Testbed
Name of International Conference: (Link to website)	Network and Distributed System Security https://www.ndss-symposium.org/
Title of Research Paper:	Poster: Detecting Anomalous LAN Activities under Differential Privacy
Name of all Co-authors (if any)	Donlapark Ponnoprat, Hideya Ochiai, Kuljaree Tantayakul, Touchai Angchuan, and Sinchai Kamolphiwong
<p>Comments or feedback received at the conference:</p> <p>What kind of features are used for anomaly detection?</p> <p>Is the used feature a matrix or a 1-d array?</p> <p>What does our system model look like?</p>	
<p>Contribution to the project:</p> <p>It provides a privacy-preserving approach to release LAN data collected from this project. We hope it can be integrated seamlessly to the currently collected data in this project and subsequent projects.</p>
