FADING OF THE ULTRA SHORT WAVE AND ITS RELATION
TO THE METEOROLOGICAL CONDITIONS

By

Kunio HIRAO

(Received June 12, 1956)

CONTENTS

| | |
|---|-----|
| ABSTRACT..... | 191 |
| Chapter I. General Introduction | 192 |
| Chapter II. Instrumental | |
| § 1. Introduction..... | 195 |
| § 2. Radio instrument | 195 |
| § 3. Meteorological instruments | 197 |
| § 4. Calculating instruments | 200 |
| Chapter III. Theoretical Foundation | |
| § 1. Scattering coefficient of turbulence in the atmosphere | 203 |
| § 2. Period of scatter fading..... | 205 |
| § 3. Period of scintillation fading | 205 |
| § 4. Longer period fading | 206 |
| § 5. Conclusion | 207 |
| Chapter IV. Fading and Propagation Distance | |
| § 1. Introduction..... | 208 |
| § 2. Experiment | 208 |
| § 3. Discussion of the results | 209 |
| § 4. Conclusion | 215 |
| Chapter V. Diurnal Variation of Short Period Fading | |
| § 1. Introduction..... | 217 |
| § 2. Diurnal variation of intensity | 217 |
| § 3. Diurnal variation of spectrum..... | 220 |
| § 4. Conclusion | 222 |

| | |
|--|-----|
| Chapter VI. Turbulence in Temperature and Refractive Index | |
| § 1. Introduction..... | 223 |
| § 2. Temperature fluctuation..... | 224 |
| § 3. Fluctuation of refractive index | 230 |
| § 4. Fluctuation of wet-bulb temperature..... | 232 |
| § 5. Conclusion | 236 |
| Chapter VII. Schematic Model of Fading | |
| § 1. Model of spectrum of fading | 238 |
| § 2. Time variation of spectrum | 238 |
| § 3. Variation of fading versus frequency | 239 |
| § 4. Variation of fading versus propagation distance..... | 240 |
| § 5. Variation of fading versus the profile along the path | 241 |
| § 6. Conclusion | 242 |
| Chapter VIII. General Conclusion | 243 |
| Acknowledgement | 244 |
| References | 244 |
| Appendix | 246 |
