GEOMAGNETIC STORMS AND IONOSPHERIC DISTURBANCES

By

Tatsuzo OBAYASHI

JUNE 1959

CONTENTS

Abstract	375
General Introduction	377
Part I. Morphology of Geomagnetic and Ionospheric Storms	384
Chapter 1. World-Wide Characteristics of Sudden Commencements of Magnetic Storms	385
Chapter 2. Main Phase of Geomagnetic Storms	406
Chapter 3. World-Wide Patterns of Ionospheric Storms	410
Chapter 4. Development of Ionospheric Storms	420
Chapter 5. Anomalous Characteristics of Polar Storms	432
Part II. Dynamo Theory of Magnetic Storms	445
Chapter 1. Historical Background of the Dynamo Theory	446
Chapter 2. Mathematical Derivation of the Dynamo Theory	449
Chapter 3. Possible Wind System for Geomagnetic Variations	453
Chapter 4. Current Systems derived from the Dynamo Theory	461
Part III. Geomagnetic Storms and the Earth's Outer Atmosphere	466
Chapter 1. The Earth's Outer Atmosphere	467
Chapter 2. Hydromagnetic Oscillations of the Ionized Outer Atmosphere	470
Chapter 3. The Model of the Outer Ionosphere	481
Chapter 4. Geomagnetic Storm Effects in the Outer Atmosphere	485
Chapter 5. Solar Corpuscular Emission and the Interplanetary Space	496
Conclusions	503
Acknowledgements	505
Bibliography	506
List of Publications	512
