STUDY ON MASS SPECTROMETER FOR DIRECT MEASUREMENT  
OF THE UPPER-ATMOSPHERE COMPOSITION

By

Nobuyoshi FUGONO

(Received Feb. 27, 1970)

CONTENTS

<b>ABSTRACT</b> .....	238
<b>CHAPTER 1. Reviews of Mass Spectrometer used in Space Vehicle</b> .....	238
1.1 Introduction .....	238
.1 Outline of the Upper-Atmosphere .....	238
.2 Method to Measure the Upper-Atmosphere Composition .....	244
(a) Absorption of Solar Ultra-Violet Radiation .....	244
(b) Air-Glow .....	247
(c) Chemical Release .....	250
(d) Mass Spectrometry .....	251
1.2 Static Mass Spectrometer .....	252
.1 Deflection Type .....	252
.2 Time of Flight Type .....	254
.3 Ion Trap .....	256
1.3 Dynamic Mass Spectrometer .....	258
.1 Radio Erequency Type .....	258
.2 Quadrupole Field Type .....	261

.3 Resonant Type .....	266
1.4 Discussion .....	266
CHAPTER 2. Mass Spectrometer Using Spatially Periodic Static Field .....	268
2.1 Introduction .....	268
2.2 Motions of Charged Particles Passing Through Spatially Periodic Static Fields .....	268
.1 Axially Symmetric Periodic Magnetic Field .....	268
.2 Axially Symmetric Periodic Electric Field .....	269
.3 Quadrupole Periodic Magnetic Field .....	270
.4 Quadrupole Periodic Electric Field .....	271
.5 Discussion .....	272
2.3 A Configuration of Mass Spectrometer Using Spatially Periodic Static Field .....	274
2.4 Calculation of Orbits of Charged Particles .....	276
2.5 Investigation in the Case of Finite Length of Sensor .....	278
2.6 Investigation into Actual Arrangement of Magnetic Field .....	279
2.7 Prototype .....	280
2.8 Experiment .....	282
2.9 Discussion .....	284
CHAPTER 3. Problems Accompanied with Experiments on Space Vehicle and Its Calibrations.....	285
3.1 Introduction .....	285
3.2 Effects Originated by Invasion and High Speed Flight of Space Vehicle .....	286
.1 Effects of Aerodynamics .....	286
.2 Ram Effect .....	286
.3 Pressure Effect .....	288
.4 Potential and Field Effect .....	289
.5 Others .....	292
3.3 Influences Appeared in Data of Measurement .....	292
.1 Characteristics of Velocity .....	292
.2 Characteristics of Attack-Angle .....	295
.3 Characteristics of Potential .....	298
3.4 Characteristics for Active Species of the Upper-Atmosphere .....	299
3.5 Calibration .....	299
.1 Calibration as an Ordinary Mass Spectrometer .....	299
.2 Calibration for Characteristics Caused by High Speed Flight .....	300
.3 Calibration for Active Species .....	302
.4 Calibration System .....	304
(a) Outline of the System .....	304
(b) Generator and Supplier of Gas Species .....	305
(c) Plasma Source .....	307

(d) Main Vacuum Chamber .....	310
(e) Standard Mass Spectrometer .....	310
(f) Faraday Cup .....	311
(g) Data Processing .....	312
(h) Support Equipments .....	312
CHAPTER 4. Experiment of Spatially Periodic Static Field Type Mass Spectrometer on Board Japanese Sounding Rocket .....	313
4.1 Constitution of the Flight Instruments .....	313
4.2 Sensor .....	314
4.3 Electronic Circuits .....	316
4.4 Pre-Flight Calibration .....	317
4.5 Integration of Payload .....	318
4.6 Result of Flight Experiment .....	320
4.7 Discussion .....	321
CHAPTER 5. Concluding Remarks .....	323
Acknowledgements.....	324
References.....	324
Appendix .....	331
