

CONTENTS

Solar-Terrestrial Disturbances of August, 1972

1.	Introduction	<i>By Kasuya</i>	289
2.	Developments of Solar Active Regions	<i>By Maeda, and Inuki</i>	291
3.	Characteristics of Solar Radio Emission	<i>By Yamashita, Mitobe, and Isobe</i>	303
4.	Solar X-ray Flares and Their Corresponding Sudden Ionospheric Disturbances	<i>By Ohshio</i>	311
5.	Solar Proton Events and Polar Cap Disturbances	<i>By Hakura, Ishii, Asakura and Terajima</i>	341
6.	Riometer Observation at Syowa Station	<i>By Ose, Isozaki, and Miyazaki</i>	355
7.	VLF Emissions and Whistlers Observed During the Geomagnetic Storms	<i>By Ondo, Tanaka, Nishizaki, and Nagayama</i>	361
8.	General Feature of Ionospheric Disturbances Appeared Vertical Sounding	<i>By Koizumi, Ohyama, Hidome, and Echizenya</i>	371
9.	A Study of Traveling Ionospheric Disturbances in F-Region	<i>By Takenoshita, Echizenya, Koizumi, and Ohyama</i>	385
10.	Observation of Faraday Rotation	<i>By Nakata, Kan, Nemugaki, Koizumi, and Okamoto</i>	399
11.	Anomalous Propagation of VHF Waves in the Trans-Equatorial Paths	<i>By Yamaoka, Tanohata, and Tsuchiya</i>	405
12.	HF Radio Wave Propagation Disturbances	<i>By Maeda, and Miyamoto</i>	423
13.	LF/MF/HF Radio Wave Propagation Disturbances	<i>By Wakai, Ouchi, Nemoto and Kogaku</i>	431
14.	Simultaneous Measurement of Intensities and Phase of Loran-C Waves	<i>By Ouchi, Fujii, and Wakai</i>	443
15.	Observations of the D-Region during SID's by LF Radio Wave over Short Path	<i>By Takenoshita, Takeuchi, and Echizenya</i>	451
16.	On the Relation between the Solar Activity and the Tidal Force on the Sun Induced by the Planets	<i>By Takahashi</i>	459
17.	Summary.....	<i>By Hakura</i>	467
	International Geophysical Calendar for 1975		475
