

JOURNAL OF THE RADIO RESEARCH LABORATORIES

CONTENTS

- | | |
|--|--|
| I. Observed Time Discontinuity of Clock Synchronization in Rotating Frame of the Earth | By Y. Saburi 255 |
| II. A Proposal of Accurate Time Dissemination Using TV Signals from a Broadcasting Satellite | By F. Takahashi 267 |
| III. Automated System for ISS Control | By T. Iida, M. Sato,
and A. Suzuki 285 |
| IV. Observations of Linear Polarization of the Crab Nebula during an Occultation by the Solar Corona (II) | By N. Kawajiri, F. Takahashi, T. Ojima, N. Kawano
and C. Miki 305 |
| Short Notes | |
| V. Consideration on SCPC (Single Carrier Per Channel) System Using Medium-Capacity Communication Satellite for Experimental Purposes | By T. Saruwatari 319 |
| VI. Effects of Noise Reduction by Means of Correlation Processing | By T. Takasugi and J. Suzuki 331 |
| VII. International Geophysical Calendar for 1977 | 337 |
