

Appendix 2.2

Report of International Conference Presentation

Name: (Presenter)	Hay Mar Soe Naing
Affiliation:	University of Computer Studies, Yangon, Myanmar
Project Title:	Spoof Detection for Automatic Speaker Verification
Name of International Conference: (Link to website)	27 th Conference of the Oriental COCOSDA, 2024 https://ococosda2024.github.io/
Title of Research Paper:	UCSYSpooof: A Myanmar Language Dataset for Voice Spoofing Detection
Name of all Co-authors (if any)	Win Pa Pa, Aye Mya Hlaing, Myat Aye Aye Aung, Kasorn Galajit, Candy Olivia Mawalim
Comments or feedback received at the conference: <ol style="list-style-type: none"> 1. The paper offers a valuable contribution to spoof detection research by creating a Myanmar-specific dataset and exploring multiple speech synthesis and conversion techniques. The technical implementation is sound, and the results demonstrate the effectiveness of the dataset. 2. This The paper presents a novel dataset, UCSYSpooof, which is tailored to spoofing detection for the Myanmar language, filling a gap where such datasets have been lacking. The generation of spoofed speech using five distinct approaches—including end-to-end speech synthesis, vocoder-based techniques, and GMM-based voice conversion methods—is an innovative contribution. This dataset enables more focused research in low-resource languages like Myanmar, which is not commonly covered in existing spoof detection datasets. 	
Contribution to the project: <p>Proposed a new voice spoofing dataset for Myanmar language by using various spoofing methods, enhancing the effectiveness of speaker verification with the newly developed UCSYSpooof dataset for the Myanmar language.</p> <p>This conference covers the scope of -</p> <p>Audio, Speech and Language Processing</p> <p>Datasets, Benchmark Systems, Models and Shared Tasks</p> <p>Multimedia, Biomedical and Health Informatics</p> <p>Information Forensics and Security</p>

UCSYSpoof: A Myanmar Language Dataset for Voice Spoofing Detection

Win Pa Pa, Aye Mya Hlaing, Myat Aye Aye Aung
Kasorn Galajit, Candy Olivia Mawalim

Presented By :

Hay Mar Soe Naing

University of Computer Studies, Yangon
Myanmar

Date : 17th, Oct 2024

Statistic of UCSYSPOOF Dataset

Label	Subset Type	No. of Speaker	No. of Utterance
Genuine	Genuine	3 (4K utts/each)	12,000
Spoofed	Vocoder-based	3	23,932
	FreeVC-based	3	24,000
	Text-to-speech	1	8,000
	GMM VC	2	8,000
	GMM DIFVC	2	8,000

[Required Documents]

- A) Presentation Materials (e.g. PPT slides)
- B) Final Program of the conference

A handwritten signature in black ink, appearing to read "Haymar", written in a cursive style.
