

JOURNAL
OF THE
RADIO RESEARCH LABORATORIES

APRIL 1957

CONTENTS

- I. On the Disturbances of Radio Propagation along the North Polar
Route *By Y. Hakura* 101
- II. Results of Experiments on VHF Overland Propagation beyond the
Radio Horizon
. *By S. Niwa, S. Watanabe, H. Saito, T. Sasaki, Y. Fujii
and M. Minowa* 111
- III. A New Type VHF Field Intensity Meter using a Loop Antenna
. *By H. Koseki* 123
- IV. Standard Hyper-Q Quartz Crystal (100 kc GT-cut)
. *By Y. Hiruta* 127
- V. Wide-band Heterodyne Frequency Meter for Microwave Range
. *By G. Kondo* 131
- VI. Wave Propagation over an Irregular Terrain (I)
. *By K. Furutsu* 135
- VII. Meteorological Influences on the Hourly Median Field Strength of
Ultra Short Waves in the Diffraction Region
. *By K. Tao* 155

METEOROLOGICAL INFLUENCES ON THE HOURLY MEDIAN FIELD STRENGTH OF ULTRA SHORT WAVES IN THE DIFFRACTION REGION

By

Kazuhiko TAO

(Received Aug. 15, 1956)

CONTENTS

| | |
|---|-----|
| ABSTRACT..... | 156 |
| Chapter I. Introduction and Historical Review | 157 |
| Chapter II. Statistics for the Seasonal and Geographical Variations of the Vertical Gradient of Refractive Index in the Lower Atmosphere | 160 |
| § 2. 1. Seasonal and Geographical Variations of the Vertical Gradient of Refractive Index | 160 |
| § 2. 2. Relationship between the Vertical Gradient of Refractive Index and the Meteorological Elements | 172 |
| § 2. 3. Some Statistics on Nocturnal Inversion | 176 |
| § 2. 4. The ΔN -Distribution Map and the Dynamic Climatological Con- sideration | 186 |
| Chapter III. Propagation Theory in the Diffraction Region | 191 |
| Chapter IV. Comparison of the Theoretical and Experimental Results in VHF Field Strength in the Diffraction Region..... | 197 |
| § 4. 1. Some Statistical Aspects of VHF Field Strength..... | 197 |
| § 4. 2. Comparison of the Hourly Median Field Strength in the Daytime with the Vertical Gradient of Refractive Index | 205 |
| § 4. 3. Relationship between the Hourly Variation of Field Strength and the Vertical Gradient of Refractive Index..... | 210 |
| Chapter V. Individual Examples and Statistical Aspects of Abnormally High Field Strength..... | 214 |
| § 5. 1. Relationship between the Abnormal Distribution of Refractive Index and the Hourly Median Variation of Field Strength | 214 |
| § 5. 2. Some Considerations for the Field Strength of Ultra Short Waves at Night..... | 233 |
| § 5. 3. Statistical and Synoptic Investigations on the Abnormally High Field Strength at Night..... | 245 |
| Chapter VI. Conclusions | 250 |
| Acknowledgments | 251 |
