

JOURNAL OF THE RADIO RESEARCH LABORATORIES

JANUARY/MARCH 1969

CONTENTS

- | | |
|--|----|
| I. Observations of the Ionospheric Absorption at Oblique Incidence during the IQSY
.....By <i>N. Wakai, C. Ouchi, C. Nemoto, T. Kogaku, and Y. Echizenya</i> | 1 |
| II. Some Characteristics of the <i>Es</i> Layer in Japan.....By <i>T. Koizumi</i> | 17 |
| III. Eigenvalues of Spheroidal Wave Functions and Their Branch Points for Complex Values of Propagation ConstantsBy <i>T. Oguchi</i> | 51 |
| IV. A Mass Spectrometer on the Ionosphere Sounding Satellite and Its Calibrations (I)
.....By <i>N. Fugono, K. Aikyo, R. Utagawa, and T. Suitsu</i> | 67 |
| V. Formant Frequency Extraction using Inverse Filtering and Moment Calculation and Its Evaluation by Synthesized SpeechBy <i>M. Nakatsui and J. Suzuki</i> | 77 |
| VI. [Short Note]
Method of Observation of Glottal Source Wave using Digital Inverse Filtering in Time Domain
.....By <i>M. Nakatsui and J. Suzuki</i> | 95 |
