

JOURNAL OF THE RADIO RESEARCH LABORATORIES

SEPTEMBER/NOVEMBER 1969

CONTENTS

I. Analysis of Observational Data obtained by Alouette II.		
1.	On the Structure of the Upper Ionosphere Deduced from $N(h)$ Profiles.....	173
	<i>By K. Tao and H. Hojo</i>	
2.	Structure of the Topside Ionosphere Deduced from Resonance Spikes on the Topside Ionograms	185
	<i>By N. Matuura and H. Inuki</i>	
3.	Proton Cyclotron Echoes in the Topside Ionograms	207
	<i>By N. Matuura, R. Nishizaki and M. Nagayama</i>	
4.	Galactic Noise Spectrum and Solar Radio Bursts in Hecto-Decametric Wave Region	215
	<i>By Y. Hakura, R. Nishizaki and K. Tao</i>	
5.	Comparison of f_oF2 from Two Observational Methods of Topside Sounding and Ground Based Sounding	227
	<i>By R. Nishizaki and M. Nagayama</i>	
II. Obstacle-Gains in Radio Wave Propagation over an Inhomogeneous Earth... <i>By K. Furutsu and Robert E. Wilkerson</i>		
		235
III. IUWDS International Geophysical Calender for 1970.....		
	Contents of Volume 16, 1969	251
