STRUCTURE OF TOPSIDE IONOSPHERE IN HIGH LATITUDES

By

Katsuhide MARUBASHI

(Received July 24, 1970)

CONTENTS

ABSTRACT	337
CHAPTER I Introduction	338
1.1 Historical review of the study of the high-latitude ionospheric F region	338
1.2 Problems concerning the equilibrium state of ion and electron distribution in high latitudes	342
CHAPTER II Average Profile of Electron Density and Scale Height	344
2.1 Method of analysis.....	344
2.2 Autumnal profile.....	349
2.3 Seasonal variation	359
CHAPTER III Detail of the Characteristic Structure of the Ionosphere in High Latitudes	365
3.1 Presentation of some examples	365
3.2 Polar peak and auroral peak	370
3.3 Trough	375
CHAPTER IV Ionospheric Variation Associated with Geomagnetic Activity	378

CHAPTER V Theoretical Consideration on Equilibrium State in the Polar Ionosphere	386
5.1 Theoretical consideration on the polar peak and the auroral peak	386
5.2 Dynamics in the topside ionosphere	389
5.2.1 Static equilibrium and dynamic diffusive equilibrium	389
5.2.2 Escape problem of the ionospheric plasma into the magnetospheric tail	394
5.2.3 Inter-relation between the trough and the plasmopause	403
CHAPTER VI Conclusion and Discussion	406
Acknowledgement	409
APPENDIX Geometry of the Dipole Field and the Gravitational Acceleration along the Line of Force	409
References	411
