

# JOURNAL OF THE RADIO RESEARCH LABORATORIES

---

I. Observations of the Ionospheric Absorption at Oblique Incidence during the IASY ..... By C. Ouchi, C. Nemoto, N. Wakai, T. Kogaku and I. Yamazaki	481
II. Branch Echo Traces on Topside Ionograms Caused by Geomagnetic Field-Aligned Irregularities in Electron Density ..... By Y. Nakamura, N. Matuura and R. Nishizaki	503
III. Determination of Elements of Recurrent and Near-Recurrent Orbits and Their Application to Operational Satellites ..... By K. Takahashi and K. Kawakami	519
IV. Pointing Accuracy and Electrical Performance of Kashima 26 m $\phi$ Antenna, obtained from Radio Astronomical Observations ..... By N. Kawano and M. Inoue	543
V. Rocket Observations of the Ionosphere over Syowa Station, Antarctica ..... By S. Miyazaki	551
VI. Stability of Simultaneous Two-Wavelength Dye Laser and its Application to the Differential Absorption Method ..... By H. Inomata and T. Igarashi	573
VII. Plasmopause Sounder ..... By T. Ondoh	583
VIII. Low Latitude Whistlers observed at Okinawa Observatory (Geomag. Lat. 15.3°N)..... By M. Kotaki, T. Ondoh, T. Murakami, S. Watanabe, I. Nishimuta and M. Yamanishi	589
IX. Notice .....	595
