

JOURNAL  
OF THE  
RADIO RESEARCH LABORATORIES

MARCH/JULY 1980

---

CONTENTS

- |   |                                  |
|---|----------------------------------|
| I. Effect of Incoherent Scattering on Attenuation<br>and Cross Polarization of Millimeter Wave due to Rain:<br>Preliminary Calculations at 34.8 and 82 GHz for<br>Spherical Raindrops ..... | <i>By T. Oguchi</i> 1            |
| II. Ionospheric Scintillation and Fluctuation of<br>Faraday Rotation Caused by Spread- <i>F</i> and<br>Sporadic- <i>E</i> over Kokubunji, Japan .....                                       | <i>By K. Sinno and M. Kan</i> 53 |
| III. Probability of Collision and Methods of Avoiding<br>Collision between Geostationary Satellites .....   | <i>By K. Takahashi</i> 79        |
| IV. Satellite Systems for Land Mobile Communications .....  | <i>By T. Iida</i> 97             |
| V. Characteristic Degradation of a Delay-Lock<br>Discriminator due to the Transmission Channel<br>Distortion .....  | <i>By M. Yokoyama</i> 117        |
