

SOLAR-TERRESTRIAL DISTURBANCES OF JUNE-SEPTEMBER 1982

CONTENTS

| | | |
|--|--|----|
| I. Introduction | By Y. Hakura and M. Ohshio | 1 |
| II. Solar Activity | By H. Kumagai, K. Ohbu, C. Ouchi, T. Isobe, T. Hori, and E. Ouchi | 3 |
| 1. Introduction | | 3 |
| 2. General View | | 4 |
| 3. Active Regions | | 6 |
| 4. Flares and Related Phenomena | | 18 |
| 5. Conclusion | | 21 |
| III. Solar Flares, Flare Particles and Geomagnetic Disturbances | By T. Ogawa | 23 |
| 1. Introduction | | 23 |
| 2. Phenomena associated with Geomagnetic Disturbances in June, July and September 1982 | | 24 |
| 3. Big Storm during July 13-14 | | 39 |
| 4. Brief Comparisons among Three Solar-Terrestrial Events | | 45 |
| 5. Summary | | 46 |
| IV. Ionospheric Disturbances | | |
| 1. Solar X-ray Flares and Their Corresponding Sudden Ionospheric Disturbances | By M. Ohshio, Y. Terajima, and K. Ohtaka | 49 |
| 1. Introduction | | 49 |
| 2. Data Used | | 50 |
| 3. Occurrence Frequency of S.P.A.'s | | 51 |
| 4. Large Solar X-ray Flares | | 53 |
| 5. Giant Solar X-ray Flares | | 55 |
| 6. Quantitative Investigation of the Relationship between Solar X-ray Flares and S.P.A.'s | | 60 |
| 7. Calculation of the Physical Quantities regarding Maximum Values of S.P.A.'s | | 66 |
| 8. Height Distributions of Electron Densities at the Disturbance | | 69 |
| 9. Other Sudden Ionospheric Disturbances | | 76 |

| | |
|--|-----|
| 10. Large Solar X-ray Flares through the Year of 1982 | 79 |
| 11. Conclusion | 82 |
| 2. Sudden Increases in Total Electron Content (SITECs) induced by Solar Flares | |
| <i>By T. Ogawa and K. Ohbu</i> | 87 |
| 1. Introduction | 87 |
| 2. Brief Review of Solar Flare Emissions causing SITEC | 88 |
| 3. SITEC Events during June—August 1982 | 91 |
| 4. Statistical Characteristics | 100 |
| 5. Summary | 102 |
| 3. General Feature of Ionospheric Disturbances appearing in Vertical Soundings | |
| <i>By M. Ohshio, T. Koizumi, S. Hidome, T. Oda, Y. Echizenya, S. Kamishikiryō, and H. Maeno</i> | 105 |
| 1. Introduction | 105 |
| 2. Characteristic Phenomena during the Period | 106 |
| 3. Conclusions | 126 |
| 4. Topside Ionospheric Disturbances as revealed from Sounder Observations by ISIS-2 Satellite | |
| <i>By K. Aikyo, R. Nishizaki, and N. Matuura</i> | 131 |
| 1. Introduction | 131 |
| 2. Topside Ionosphere in the July Event | 133 |
| 3. Topside Ionosphere in the September Event | 141 |
| 4. Summary of Observations | 144 |
| Appendix | 146 |
| 5. Observation of Ionospheric Total Electron Content using ETS-II Satellite Beacon | |
| <i>By H. Minakoshi, K. Sinno, and I. Nishimuta</i> | 151 |
| 1. Introduction | 151 |
| 2. Observations | 152 |
| 3. Discussion | 154 |
| 4. Summary | 161 |
| 6. Magnetospheric VLF Emissions observed by ISIS Satellites during Four Geomagnetic Storms in July and September 1982 | |
| <i>By T. Ondoh, Y. Nakamura, and S. Watanabe</i> | 165 |
| 1. Introduction | 165 |
| 2. Observation of VLF Emissions by the ISIS Satellites during Geomagnetic Storms | 166 |
| 3. Auroral-type VLF Hiss observed during the Geomagnetic Storm on July 14–15, 1982 | 167 |

| | |
|--|-----|
| 4. Auroral-type VLF Hiss and Hook-type VLF Emission observed during the Geomagnetic Storm on September 6–7, 1982 | 170 |
| 5. Chorus Emissions observed at Mid-latitudes in the Main Phase of Geomagnetic Storm on September 22, 1982 | 171 |
| 6. Characteristics of ELF Hiss observed during the Geomagnetic Storm | 172 |
| 7. Auroral-type VLF Hiss observed during the Main Phase of Geomagnetic Storm on September 27, 1982 | 177 |
| 8. Conclusion | 179 |
| 7. Some Properties of Trans-equatorial Ion Whistlers observed by ISIS Satellites during Geomagnetic Storms | |
| <i>By S. Watanabe and T. Ondoh</i> | 181 |
| 1. Introduction | 181 |
| 2. Time-compressed Dynamic Spectra and Propagation of the TEI Whistler | 183 |
| 3. Profile of Proton Relative Density in Geomagnetic Equatorial Plane | 188 |
| 4. Anomalous Dynamic Spectrum observed on September 6, 1982 | 191 |
| 5. Occurrence Probability of TEI Whistler | 199 |
| 6. Summary | 201 |
| 8. Propagation Disturbances of VLF Radio Waves on the Trans-polar Paths | |
| <i>By T. Kikuchi, A. Ohtani, and S. Isozaki</i> | 203 |
| 1. Introduction | 203 |
| 2. Propagation Disturbances due to Solar Proton Flares and Geomagnetic Storms | 205 |
| 3. Phase Anomalies associated with Storm Sudden Commencements (SSC's) | 211 |
| 4. Concluding Remarks | 216 |
| 9. Variations in HF Wave Fieldstrength for Short Paths in Japan | |
| <i>By Y. Takenoshita, T. Kogaku, and S. Okamoto</i> | 219 |
| 1. Introduction | 219 |
| 2. Decreases in Radio Wave Fieldstrength in the Daytime during June 1982 | 220 |
| 3. Fluctuations of Diurnal Variation in HF Radio Wave Fieldstrength during a Period from 14th to 18th of July 1982 | 222 |
| 4. Fluctuations of the Diurnal Variation in Fieldstrength in association with Geomagnetic Storms during the First Ten Days of September 1982 | 223 |
| 5. Fluctuations of the Diurnal Variation in Fieldstrength in association with Geomagnetic Storms during the Last Ten Days of September 1982 | 224 |
| 6. Conclusion | 226 |
| 10. Propagation Disturbances of HF Radio Waves for Long-distance Circuits | |
| <i>By M. Ichinose, Y. Miyamoto, T. Kidokoro, T. Ishii, and T. Kurosu</i> | 227 |

| | |
|---|-----|
| 1. Introduction | 227 |
| 2. Propagation Phenomena during SWF | 228 |
| 3. Communication Interruption accompanying Geomagnetic Storm | 234 |
| 4. Conclusion | 236 |
| 11. HF Doppler Observations | |
| <i>By T. Kikuchi, H. Sugiuchi, T. Ishimine, H. Maeno,</i> <i>and S. Honma</i> | 239 |
| 1. Introduction | 239 |
| 2. Theory of HF Doppler Technique | 240 |
| 3. Observations | 242 |
| 4. Conclusion | 253 |
| 12. Ionospheric Scintillations of Geostationary Satellite Radio Waves | |
| <i>By H. Kumagai, T. Ogawa, and T. Hori</i> | 257 |
| 1. Introduction | 257 |
| 2. 136-MHz Scintillations observed on July 14, 1982 | 258 |
| 3. 4-GHz Scintillations observed on September 7, 1982 | 265 |
| 4. Conclusion | 266 |
| 13. Aurora Observation using the Syowa Station 50-MHz Doppler Radar | |
| <i>By K. Igarashi, T. Ogawa, Y. Kuratani, R. Fujii,</i> <i>and T. Hirasawa</i> | 269 |
| 1. Introduction | 269 |
| 2. Observation Method | 270 |
| 3. Spectrum Analysis of Radar Echoes | 272 |
| 4. Conclusion | 276 |
| 14. Equivalent Current Systems for Global Geomagnetic Variations during the Geomagnetic Storm of July 13 to 14, 1982 | |
| <i>By T. Ondoh and Y. Sano</i> | 279 |
| 1. Introduction | 279 |
| 2. Equivalent Current System at 1630 UT, July 13, 1982 just after the SC | 280 |
| 3. Equivalent Current Systems in an Initial and an Active Parts of the Storm Main Phase | 283 |
| 4. Conclusion | 287 |
| V. Summary | |
| <i>By T. Ondoh</i> | 291 |
| 1. Solar-Terrestrial Disturbances of June—September 1982 and Future Problems | 292 |
| 2. Geomagnetic Storms and Their Related Geophysical Phenomena of June—September 1982 | 296 |
| 3. Conclusion | 312 |
