

Special Issue

KEY STONE PROJECT

—Crustal Deformation Monitoring System around the Tokyo Metropolitan Area—

(Received on December 18, 1998)

CONTENTS

1. Introduction	<i>Ken'ichi Okamoto</i>	1
2. Overview of the Key Stone Project	<i>Taizoh Yoshino</i>	3
3. KSP VLBI System		
3.1 Observation System		
3.1.1. Antenna and Receiver System	<i>Noriyuki Kurihara, Hiroshi Takaba, Akihiro Kaneko, and Kouichi Sebata</i>	7
3.1.2 Frequency Standards and Instrumental Delay Calibration System	<i>Yuko Hanado, Michito Imae, Noriyuki Kurihara, Mizuhiko Hosokawa, Hitoshi Kiuchi, Kouichi Sebata, Mamoru Sekido, and Tadahiro Gotoh</i>	15
3.1.3 KSP Data-Acquisition System	<i>Hitoshi Kiuchi, Jun Amagai, Shin'ichi Hama, and Michito Imae</i>	25
3.1.4 Observation and System Management Software	<i>Yasuhiro Koyama, Takahiro Iwata, and Hiroshi Takaba</i>	33
3.1.5 Observation Support System	<i>Kouichi Sebata, Jun Amagai, and Masato Furuya</i>	39
3.2 Data Reduction System		
3.2.1 Correlation Processing System	<i>Hitoshi Kiuchi, Tetsuro Kondo, and Mamoru Sekido</i>	47
3.2.2 Correlation Processing Software	<i>Mamoru Sekido, Hitoshi Kiuchi, and Tetsuro Kondo</i>	55
3.2.3 KSP Bandwidth Synthesizing Software	<i>Tetsuro Kondo, Mamoru Sekido, and Hitoshi Kiuchi</i>	67
3.3 Data Analysis System		
3.3.1 Data Analysis Software	<i>Yasuhiro Koyama, Kosuke Heki, Yukio Takahashi, and Masato Furuya</i>	77
3.4 Real-Time VLBI System		
3.4.1 Real-Time VLBI Data Transfer and Correlation System	<i>Hitoshi Kiuchi, Tetsuro Kondo, Mamoru Sekido, Yasuhiro Koyama, Michito Imae, Takashi Hoshino, and Hisao Uose</i>	83
3.4.2 Real-Time Correlation Processing Control Software	<i>Mamoru Sekido, Tetsuro Kondo, and Hitoshi Kiuchi</i>	91
4. KSP SLR System		
4.1 Design Concept of the KSP SLR System	<i>Hiroo Kunimori</i>	97
4.2. Telescope and Enclosing Dome	<i>Jun Amagai, Hideyuki Nojiri, Chihiro Miki, and Hiroo Kunimori</i>	103
4.3 Lasers and Transmission/Receiving Optics	<i>Hiroo Kunimori and Jun Amagai</i>	111
4.4 Timing System	<i>Jun Amagai and Hiroo Kunimori</i>	115
4.5 Safety and Surveillance System	<i>Futaba Katsuo, Hiroo Kunimori and Hideyuki Nojiri</i>	119

4.6 Observation Software	<i>Tadahiro Gotoh and Toshimichi Otsubo</i>	123
4.7 Analysis Software	<i>Toshimichi Otsubo and Futaba Katsuo</i>	129
4.8 A Concept of Monitoring the Telescope Reference Point by Using Multiple Ground Targets	<i>Futaba Katsuo, Toshimichi Otsubo, Jun Amagai, and Hideyuki Nojiri</i>	135
5. GPS System of KSP Geodetic Network	<i>Ryuichi Ichikawa</i>	141
6. Seismic Intensity Monitoring System	<i>Noriyuki Kurihara, Mamoru Sekido, Yasuhiro Koyama, and Ryuichi Ichikawa</i>	147
7. Observation Results		
7.1 Accuracy Improvement in KSP VLBI System	<i>Tetsuro Kondo, Kouichi Sebata, Masato Furuya, and Yasuhiro Koyama</i>	151
7.2 Routine Observation Results of the KSP VLBI Network	<i>Masato Furuya, Kouichi Sebata, Yasuhiro Koyama, and Tetsuro Kondo</i>	159
7.3 Global Station Coordinates Derived from SLR and VLBI Observations	<i>Toshimichi Otsubo and Yasuhiro Koyama</i>	165
7.4 Comparison between Station Movements Measured by VLBI and those Measured by GPS	<i>Yukio Takahashi and Ryuichi Ichikawa</i>	171
7.5 Effects of Atmospheric Variability on KSP Geodetic Network –Preliminary Results–	<i>Ryuichi Ichikawa, Yasuhiro Koyama, and Yukio Takahashi</i>	177
7.6 Tie of the KSP VLBI Network to the Terrestrial Reference System	<i>Yasuhiro Koyama, Eiji Kawai, Junichi Nakajima, Mamoru Sekido, Noriyuki Kurihara, Kouichi Sebata, and Masato Furuya</i>	183
8. R&D Experiments Using KSP facilities		
8.1 Optical Linked RF Interferometer	<i>Jun Amagai, Hiroo Kunimori, Hitoshi Kiuchi, and Kouichi Sebata</i>	187
8.2 VLBI Using a GPS Frequency Standard	<i>Tetsuro Kondo, Kouichi Sebata, and Jun Amagai</i>	193
8.3 Monitoring of Total Flux using a KSP Type Video Converter	<i>Kouichi Sebata, Jun Amagai, Tetsuro Kondo, and Noriyuki Kurihara</i>	199
8.4 Collocation Experiment on Four Electronics/Optical Packages for the KSP SLR System	<i>Hiroo Kunimori, Tadahiro Gotoh, Jun Amagai, Toshimichi Otsubo, Hideyuki Nojiri, Chihiro Miki, and Masato Furuya</i>	207
8.5 Center-of-Mass Correction of the Satellite AJISAI	<i>Toshimichi Otsubo, Jun Amagai, and Hiroo Kunimori</i>	213
9. Future Plans	<i>Taizoh Yoshino</i>	219
10. Concluding Remarks		
–Key Stone Project under the Internet Revolution–	<i>Fujinobu Takahashi</i>	221
